**DETAILED ACTION**

***Election/Restrictions***

1. Applicant is advised that the response to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143)
2. Restriction to one of the following inventions is required under 35 U.S.C. 121:
  - I. Claims 1-2 and 7-8, drawn to a leaf cell in class 326, subclass 104.
  - II. Claims 3-5 and 10-11, drawn to a logic circuit for magnitude comparison, classified in class 708, subclass 671.
  - III. Claims 6 and 12, drawn to a logic circuit for adding signals, classified in class 708, subclass 700.
  - IV. Claim 9, drawn to a logic circuit for adding signals with carry generation, classified in class 708, subclass 706.

The inventions are distinct, each from the other because of the following reasons:

3. Inventions of the Group I-IV are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct from each other if they are shown to be separately usable. In the instant case, invention of Group I-IV has separate utility such as selecting the signal and its inversed signal by the external control signal, comparing magnitude,

adding the signals, manipulating the signals, and adding signals with carry generation. See MPEP § 806.05(d).

4. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

5. Because these inventions are distinct for the reasons given above and the search required for Group I is not required for Groups II-IV, restriction for examination purposes as indicated is proper.

6. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art because of their recognized divergent subject matter, restriction for examination purposes as indicated is proper.
